

Standard III

Item no. : CH-STANDARD-III

A descendant of the renowned Chappuis machines, this design operates on an optimized balance mode in order to reduce winding time.

The Standard III is used for industrial winding of automatic watches, as well as for shock tests on watch heads.

The Standard III operates in programmable mode over a week, in counter mode or even in simple manual mode.

- High precision clutch drive
- Variable rotation speed
- Different intuitive programming mode
- Interchangeable box holder
- Emergency stop
- Easy loading
- Programming console with touch screen
- Program transfer possible via SD card

Technical details:

Capacity	: Up to 220 watch heads (or movements)
Rotational frequency	: 22 or 36 cycles / minute
Rotate direction	: Clockwise or anti clockwise
Dimensions	: 53H x 150W x 55D (cm)
Power supply	: 230V 50Hz (24V AC control panel)
Weight	: 63 kg
Origin	: Switzerland
