

DRYROX

Watch dryer (Before condensation test)

Datasheet, 27.05.2021, V1

 Engineered and made in Switzerland

The Dryrox device is a machine that allows a batch of watches to be dried for a configurable time.

Machine functions

- Dries by using pressurized air.
- 2 nozzles, upper (4 bar max), and lower (3 bar max).
- Rotation clockwise and/or counterclockwise.
- Average cycle time about 60 seconds.
- Manual or automatic start.
- Multiple adjustable parameters.
- Lid window.
- Touch screen.

Technical specifications

Supply voltage :	24 VDC
Power :	30W
Inlet pressure :	8 bar
Airflow :	200 l/min
Rotation frequency :	1 to 12 tr/min
Ø Borehole mini *:	18 mm
Ø Tray maxi :	256 mm
Capacity :	up to 20 watches (1 tray)
Weight :	13.5 Kg
Dimensions (Ø/h) :	360 x 235 mm
